EDUCATION

B.S. Information Technology, Minor in Psychology

George Mason University
Anticipated Graduation: December 2026

PERSONAL STATEMENT

IT student with 2+ years of hands-on experience supporting enterprise IT infrastructure, service desk operations, and end user technical support in fast paced environments. Experienced in resolving Tier 1 and Tier 2 service desk tickets, configuring user accounts and systems, troubleshooting hardware and software issues, and maintaining enterprise device environments. Skilled in Active Directory, Microsoft Office 365, endpoint deployment, and IT documentation. Known for delivering strong customer service while collaborating with cross-functional teams to improve technical processes and support business users effectively.

WORK EXPERIENCE

EduTutorVA

Tutor

Virtual

October 2023 - December 2025

- Designed custom lesson plans for underserved student populations for students that did not meet grade level expectations to enhance performance by one letter grade on average.
- Assessed progress and provided structured feedback to supervisors, facilitating iterative improvement of curriculum and student readiness for advancement.
- Improved student tests scores with 90% of students reporting an enhanced understanding of material.
- Provided comprehensive feedback and analysis to supervisors for five students to facilitate on-going growth and readiness for the next grade level.

ENSCO

IST Helpdesk Technology Assistant

Vienna, VA

February 2024 - July 2025

- Resolved 10+ Tier 1 and Tier 2 service desk tickets weekly through Jira by troubleshooting system access, software functionality, and workstation performance issues.
- Provisioned and configured enterprise user accounts and systems using Active Directory, Exchange, and Webex while maintaining compliance with security policies and service level agreements.
- Provided remote and onsite technical support for local and remote users, diagnosing hardware, software, and network connectivity issues across Windows workstation environments.
- Deployed and configured Windows laptops using Microsoft Deployment Toolkit (MDT) and PowerShell, reducing device setup time by 35%.
- Maintained enterprise device inventory and lifecycle data using Lansweeper, supporting infrastructure management and asset tracking.
- Automated software installation workflows and documented troubleshooting procedures for service desk knowledge base resources, improving IT support efficiency.

Fairfax County Public Schools

Student Technology Assistant

Springfield, VA

June 2020 - August 2020, June 2021 - August 2021

- Provided technical support to 250+ staff members and students through phone, email, and in-person troubleshooting for login, software, and device issues.
- Reimaged and configured 120+ laptops daily with Windows 10 operating systems to maintain compatibility with district systems and network infrastructure.
- Diagnosed and resolved workstation hardware, software, and peripheral troubleshooting issues across school technology environments.
- Developed troubleshooting documentation and issue tracking dashboards using Google Sheets to identify recurring problems and improve response efficiency.

Girls Who Code

Summer Immersion Program

Virtual

July 2020 - August 2020

- Built web projects using HTML, CSS, and JavaScript, designing responsive layouts and user-friendly navigation for informational websites.
- Developed a parallax-scrolling website highlighting the humanitarian crisis in Yemen, integrating embedded media and structured content.
- Applied UI/UX design principles to organize page structure, improve readability, and enhance user interaction across web pages.
- Participated in weekly technical workshops and industry discussions with women in technology to explore real-world applications of software development.

Executive Ride

Customer Outreach Representative

Springfield, VA

August 2018 - August 2019

- Responded to customer inquiries and service requests while maintaining 100% compliance with response time standards and ensuring a high level of customer satisfaction.
- Implemented cloud-based operational tools to streamline internal processes and reduce manual workflows, generating \$10K+ in annual cost savings.
- Analyzed customer engagement data and refined communication strategies, increasing marketing engagement by 18%.
- Managed customer information and reporting workflows to improve data organization, tracking, and internal decision-making efficiency.

PROJECTS

ENSCO | Capstone Presentation: Vulnerability Assessment

July 2024 - August 2024

- Conducted full lifecycle vulnerability assessments using Tenable, Jira, and CVSS severity scoring to identify and prioritize remediation across enterprise systems.
- Managed the complete service desk ticket lifecycle, tracking vulnerabilities, coordinating remediation tasks, and communicating progress with technical stakeholders.
- Authored technical documentation and stakeholder reports that translated security findings into business risks and actionable plans.

George Mason University | SQL Database Implementation

February 2023 - May 2023

- Designed an ERD and implemented a MySQL relational database to manage student, teacher, parent, and operational data.
- Developed normalized schemas with constraints and validation scripts to maintain data integrity, consistency, and reliable data retrieval.
- Created queries and visual diagrams to support data analysis, reporting, and system documentation.

ENSCO | Surface Pro Driver Deployment Automation

May 2024 - July 2024

- Led the deployment of Surface Pro driver and firmware updates across 50 plus enterprise devices using Lansweeper automation tools..
- Executed manual update processes through Remote Desktop Protocol while validating system logs and hardware status to ensure successful installation and functionality.
- Utilized remote troubleshooting and logging tools to confirm update success and resolve installation issues in real time.

HONORS
